

TEXTILES CARE AND MAINTENANCE

With regular care and maintenance, your Herman Miller furniture will provide many years of superior performance and satisfaction. To maintain the quality of your Herman Miller textiles, please follow the cleaning procedures outlined here.

The instructions for the care and maintenance of Herman Miller Products are provided to you as a service. No warranty is implied since results may vary.

Fabric

Action Office® Panels & Q™ System Panels

For normal cleaning, vacuum upholstery fabric and panel cloth as needed, using an upholstery attachment. If further cleaning is needed, dry-clean or spot clean fabric with solvent cleaner.

Do not brush fabric or panel cloth or use a vacuum attachment with a rotary brush. Brushing may permanently damage the nap or change the character of the fabric.

Do not apply water or any liquid solution to panel cloth. Wetting the fabric with any liquid solution may result in permanent damage.

Ethospace® Tiles and Resolve Blankets

For normal cleaning, vacuum upholstery fabric and panel cloth as needed, using an upholstery attachment. If further cleaning is needed, dry-clean or spot clean fabric with a solvent cleaner.

Do not brush fabric or panel cloth or use a vacuum attachment with a rotary brush. Brushing may permanently damage the nap or change the character of the fabric.

Chairs

For normal cleaning, vacuum upholstery fabric (including suspension materials such as AireWeave™, Cygnus, Pellicle®, and Flexnet™) and panel cloth as needed, using an upholstery attachment. If further cleaning is needed, dry-clean or spot clean fabric with solvent cleaner.

Do not brush fabric or use a vacuum attachment with a rotary brush. Brushing may permanently damage the nap or change the character of the fabric.

Do not apply water or any liquid solution. Wetting the fabric with any liquid solution may result in permanent damage.

Vinyl Upholstery and Vinyl Films

For normal cleaning, wash vinyl upholstery with a soft cloth or soft-bristled brush lathered with mild, nonabrasive soap and lukewarm water. Before the surface dries, wipe with a clean, dry cloth to remove any residue. This procedure may be repeated to remove stubborn dirt or stains.

Ink spots can sometimes be removed by washing with soap and water followed by isopropyl alcohol.

Do not use any cleaning method that is not listed above, as other methods may attack the vinyl and cause eventual degradation.

Leather

For normal cleaning, vacuum or dust frequently with a clean, dry cloth. If leather is soiled, it can be wiped with a damp soft cloth and a lather of any mild soap and a minimum amount of lukewarm water. Do not spot clean leather; clean the entire surface. Wipe clean with a damp cloth and dry with a clean, soft cloth.

For spots and spills, wipe excess liquid immediately with a clean cloth or sponge; let the leather air dry. If the spot is still visible, further cleaning may be necessary. Sponge the entire surface—seat, back, or chair arm—with clean, lukewarm water. Let the leather air dry; never use a hair dryer or other heat source to dry leather.

For stubborn spots and stains, apply a mild, nonabrasive soap solution with a clean, wet sponge. Rinse well and let air dry. For butter, oil, or grease, wipe the leather with a clean, dry cloth and let the remainder of the oil dissipate into the leather. Do not apply water or try to wash a grease spot.

Do not use saddle soap, cleaning solvents, oils, furniture polishes, varnishes, abrasive cleaners, detergents, or ammonia on leather; they will ruin the finish, causing it to become sticky and cracked.
