**Eames® Molded Plywood Coffee Table**

## A TABLE IN THE CLASSIC EAMES MOLD

To create this simple, lightweight table, Charles and Ray Eames applied the same breakthrough technology that led to their invention of the famous molded plywood chairs. The table's round, slightly indented top and gently curved legs are shaped by sandwiching thin wood veneers under heat and pressure. The result is a lean and easily movable piece with the unmistakable Eames look. First offered by Herman Miller in 1946, these imaginative tables are an enduring landmark of modern, functional design.

## A CHOICE OF FINISHES

The tops of molded plywood coffee tables have natural face veneers over three strong, lightweight hardwood plies. Legs are eight ply.

The two outer plies are available in cherry, walnut, natural cherry, ash, or ebony-stained ash.

Height: 15"

Top diameter: 34"
