**Eames® Sofa Compact**

## COMFORT IN TIGHT SPACES

The sofa compact's clean profile and crisp, light scale evolved from a built-in sofa that Charles and Ray Eames designed for the living room of their Pacific Palisades home. Knowing this makes "compact" seem less curious, especially for a sofa that comfortably seats three. Two horizontal foam pads with welting cord form the sofa's comfortably high back. A black enameled steel frame and chrome-plated tubular steel legs provide the foundation. In continuous production since 1954, the sofa compact remains perfectly scaled for tight spaces in executive suites, lounges, and homes.

## SUPPORT IN ALL THE RIGHT PLACES

With two foam pads along the angled back and a foam seat cushion resting on a steel and wire-spring armature, the sofa compact provides firm, flexible support from shoulders to knees.

Seat Height: 16"  
Overall Depth: 30"  
Overall Width: 72½"  
Overall Height: 35"

Eames Sofa Compact
