

Applications

- General Patient Rooms
- Coronary Care Units
- Orthopedic Clinics
- Rehabilitation Areas
- Oncology Care Areas

Revive Patient Chair

Revive is a system of patient room products designed to address the seating, sleeping, communication, and storage needs of patients and guests. The Revive Patient Chair combines personal accommodation with posture support to provide a therapeutic seating solution for patient care environments.

Design Issues

1. Personal accommodation provides a sense of dignity and attention that increases customer satisfaction and impacts patient outcomes.

The Revive Patient Chair offering supports a variety of secondary patient activities. A standard flex back and optional magazine holders, drink holders, neck pillows, footrests, and storage trays introduce accommodation and amenity.

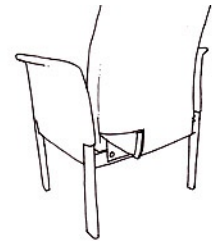

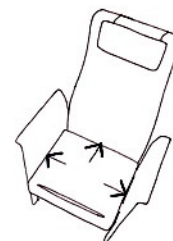

2. Designers prefer coordinated offerings that allow cohesive interior schemes and programs.

Coordinated interior materials, finishes, and furnishings allow designers to create cohesive interior spaces through design and planning. The Revive Patient Chair is part of a system of patient room products that share visual details and finish options. A collection approach to patient environments supports the design process and provides a comforting sense of order.

3. Patient Care and Waiting environments present unique service and performance criteria.

Patient seating is subject to frequent movement, harsh cleaning, and long term use. The Revive Patient chair addresses these conditions by combining aesthetics with design details that anticipate serviceability. Clean-out gaps, replaceable upholstery, welded aluminum frames, and urethane arm caps are integrated to facilitate product maintenance and extend the product's life cycle.

Details + Specifications

System Features

- Three Arm styles include Wood, Urethane, Upholstered.
- Optional Infill Panels provide patient security
- Product family includes coordinated Ottoman and Footrest
- Footrest stores below chair
- Frame accepts personal storage options such as Drink and Magazine Holders
- Non-marring resilient glide feet
- Visual details match other products within entire Revive System
- Aluminum legs withstand frequent cleaning solutions and methods
- Generous spacing between components accommodates cleaning
- Urethane Arm Caps provide durability and insure longevity in public space applications
- Available in High or Mid Back styles

Specifiable Options

- Short and High Infill panels
- Urethane Arm Caps
- Mid Back
- Pull-out Drink Holder
- Magazine Holder
- Side Tray storage shelf
- Moisture Barrier
- TB133

Finishes

- Seat, Back, and Upholstered Arms in graded or COM textiles
- Metal frame available in Brandrud metal powdercoat selections
- Arms available in wood or urethane
- Infill Panels available in wood, laminate, and graded or COM textiles.
- Side Tray available in any Brandrud wood stain

Content and Construction

- Welded Aluminum frame
- Grade A hardwood
- Zero VOC metal powder coats
- Water based adhesives on all upholstered components
- Metal to metal connections
- * Single needle top stitched coupled with synthetic fiber thread
- Upholstery foams meet or exceed California Tech Bulletin Fire Code 117

Notes

- Seat and Back foam densities can be adjusted by request

Warranty

- Limited Lifetime Warranty

Designer

- Designed by George Simons in collaboration with the Brandrud Design Team
