

TABLES: MULTITASK TABLES

FREE TABLES

Perfect for computer labs and touch down stations, our Free multitask tables come in three work surface sizes for you to choose from. The ergonomic tabletop design puts the entire work surface within arm's reach and is well suited for flat screen monitors and laptops.

- **Adjustable:** Tables can height-adjust without the need for tools to accommodate a variety of user heights.
- **Moveable:** Large slide pods under the feet make it easy to slide the tables to adjust for collaboration.
- **Accommodating:** Tables meet ADA requirements and are ideal for use in ADA applications.
- **Guaranteed:** All Free tables and accessories are backed by a 12-year warranty.
- **GREENGUARD Certified:** Excludes veneer tops.

Free™ is a trademarked original design by Formway Design, Wellington, New Zealand.

Available exclusively through Herman Miller

SPECIFICATION INFORMATION

MULTITASK TABLES

WORK SURFACES

Tables are best used with laptops and flat screen monitors. Work surfaces are constructed of 1³/₈" (2.9cm) thick Medium Density Fiberboard (MDF) and finished with high-pressure laminate or veneer. Recessed knife edges are standard on work surfaces. Choose from a laminate top with an MDF knife edge (08) or a veneer top with an MDF knife edge (09).

HEIGHT ADJUSTMENT

A grooved upper section on the leg facilitates incremental height adjustment of the tabletop without the use of tools. The upper section features a series of grooves at 7/8" (2.2cm) increments that telescope inside the lower section of the leg. A nylon split ring is inserted into one of the grooved sections to fit the tabletop at a desired height. The groove adjust mechanism allows for height adjustments of 7/8" (2.2cm) through a range of 25"H to 32"H (63.5 to 81.3cm).

LEGS

Legs are made of a 2¹/₂" (6.4cm) diameter 16-gauge steel tube. Interior tube has a chrome finish to prevent marring during height adjustments. Slide pods are made of 8" (20.3cm) diameter die-cast aluminum. The bottom of the pod has an inserted disk to allow for easy movement. Slide pods provide 2" (5.1cm) of height adjustment to level tables on uneven floors. Both the exterior tube of the legs and the slide pods are finished in powder paint.

CORD MANAGEMENT

Work surface channels are routed in several locations underneath the work surface to accept quick fix hook accessories for cord management.

ACCESSORIES

Accessories attach without the use of tools. Multitask tables accept up to two screens and one power hopper.

SCREEN SPECIFICATIONS

Height-adjustable screen is fabricated from 10-gauge roll formed aluminum and powder painted for scratch protection. 1/4" (0.6cm) diameter circular perforations attach to brackets to create a 2" (5.1cm) increment adjustment range to raise or lower the screen without tools.

POWER HOPPER

Power hopper is constructed of 18-gauge formed steel and is powder painted. It stores excess power and data cords on single-level tables. Rails slide underneath the work surface. 10-outlet unit fits inside the power hopper, along with excess cords. Power options are sold separately.

BRACKETS

Formed steel brackets twist off without tools. A groove mechanism attaches the brackets to the underside of a workstation.

QUICK FIX HOOKS

Patented quick fix hooks separate and route data and electrical cords underneath the work surface. Hooks separate power and data. Simply twist hooks into channels underneath the work surface.

ELECTRICAL UNIT

12-outlet electrical unit features 12 surge-protected outlets, as well as one input and two output phone lines. The 12' (365.8cm) power cord is a 14-gauge, heavy-duty cord with a 360° rotating plug. A sliding safety covers on each outlet helps protect users and keeps dust and debris from unused outlets. Four of the outlets are spread apart to allow room for large AC adapter blocks.

Tables ship unassembled.
